How do I correct a shift entered from EVV?

If an attendant submitted the shift for the Employer's approval but it needs to be changed, it is important that the Employer reject the shift in the web portal. The rejected shift will be returned to the Worker. After a shift is rejected, it cannot be adjusted by the Worker. The Worker will need to delete that shift and enter a new one.

Troubleshooting

User ID is Invalid

If the caller does not enter # sign after User ID, they will get a "User ID is invalid" message.

No Options Given to Record Time

If the IVR system does not recognize the phone number you are calling from, it will ask for your User ID and PIN. However, you will not hear options to record time or advance in the IVR system. IVR requires you to use the Member's landline phone that is on file with CDTN. If the member needs to update their phone number, they will need to contact CDTN or their Supports Broker.

IVR System Options

The options in the IVR system are as follows:

- "To record a timesheet entry, press ONE" this is for Workers who want to record an EVV compliant IVR shift.
- -- "To record a fob entry, press TWO" this is for Workers who want to record an EVV compliant fob shift.

I Don't Remember My PIN

Caller must use 6-digit PIN, followed by #. If forgotten, change your PIN by selecting *key after entering your User ID.
